Ratto, Alessandro Vajra.

Luca ORLANDI

Architect and an architectural historian, Orlandi graduated from the Faculty of Architecture at University of Genoa; he obtained a PhD in 2005 from the Polytechnics of Turin, within the program of History and Critics of the Architectural and Environmental Heritage, where he discussed a Thesis on architect Sinan.

He lives in Istanbul where he currently teaches History of Architecture, as Assistant Professor in the Faculty of Architecture and Design at Özyeğin University. He often participates in lectures, seminars and workshops in different Turkish universities and he has been resident professor at Politecnico di Milano. His fields of interests cover several topics like Ottoman architecture, Architect Sinan, Galata and the Genoese colonies in the Eastern Mediterranean, Contemporary Italian and Turkish architecture, and Travelogue in the Levant.

FROM GALATA TO BESIKTAŞ

Revitalization processes and transformations of the Istanbul waterfront

The aim of this presentation is to offer a general overview about the ongoing projects and processes that are transforming a consistent part of the waterfront of Istanbul, stretching from the old Galata district towards the shores of Besiktaş, on the European side of the Bosphorus. Through case studies, many samples of architectural works, both already realized or still ongoing as projects, will be considered in order to show the complexity and the difficulties encountered while designing in such delicate part of the megalopolis of almost 16 million inhabitants. Far to solving all the problems of a congested and chaotic city as Istanbul, the intention of the local authorities is to relaunch, through public and private interventions, an extent part of the coastal area of Istanbul left abandoned for too long time into a touristic destination. At the same time, with harbor facilities, new infrastructures, shopping centers, cultural activities and recreative areas, the economic impact of such transformations both for the collectivity and the municipality are taken into consideration.
